

ADITYA PATIL

(+353) 0894978543 | 24adityapatil@gmail.com | [Github](#)

PROFILE

- MSc Artificial Intelligence student at NCI Dublin (graduating Nov 2026) with a BCA (First Class , 2024).
- Skilled in Python, typescript, agentic AI and Machine learning
- Open to graduate roles from Nov 2026; eligible for 20 hrs/week part-time during term and full-time during vacations.
- Availability: Available to undertake placement from June/September 2026.

EXPERIENCE

Co-founder & AI Developer — ESGai (Feb 2025 – jul 2025)

- Designed and deployed a production-level application on Azure, integrating agentic workflows, powerBI for visuals and Retrieval-Augmented Generation (RAG) for advanced ESG data analysis.
- Oversaw product roadmap, technical architecture, scaling, coding and marketing.

AI Developer Intern — ESGai ([repo](#)) (Dec 2024 – feb 2025)

- Developed core structure for an ESG tool using n8n + Langchain implementation.
- Built and deployed a robust, scalable application on various platforms like vercel, railway, render, pythonanywhere and many more.
- Hunted and got granted \$5000 and up to \$150,000 azure infra grant.
- Got ESGai backed by Microsoft startups.

Founder MDM Calculator — React web app (Aug 2025 - present)

- Web application for government school teachers to track, calculate, and manage daily food distribution; used by over 1,000+ active users.

PROJECTS

AI Content Generation System (Python | Nov 2024)

Built an end-to-end AI content generation system using Hugging Face APIs, integrating NLP, TTS, and STT pipelines to generate style-consistent, context-aware content. ([repo](#))

AI Yoga Trainer (Python | Dec 2024)

Developed a real-time pose detection system using fine-tuned MobileNetV2 with voice feedback for posture correction, optimised for low-latency computer vision. ([repo](#))

Temporary Crypto Wallet (Python | May 2025)

Engineered a stateless wallet system integrated with MetaMask using deterministic algorithms, eliminating backend and ensuring secure, decentralised operations. ([repo](#))

Crypto Market Monitoring System (Python | Dec 2024)

Built a real-time crypto analytics pipeline with automated data ingestion, updating Excel dashboards (market cap, volume) every 70 seconds. ([repo](#))

RAG System (Domain-Specific QA) (Python | Sep 2024)

Developed a retrieval-augmented generation system using LLaMA, combining semantic search and LLMs for accurate domain-specific responses without fine-tuning. ([repo](#))

SKILLS

Languages

- Python, TypeScript, SQL.

Frameworks/Paradigm

- React, n8n, Supabase, Node.js, express.js, cron, Object-oriented design.

Dev tools

- Git, Docker, AWS, Microsoft Azure, VS Code, Linux commands, Cursor.

EDUCATION

KLE BK college, chikodi

Bachelor of Computer Application (jun 2021 - sep 2024) CGPA **8.1**

KONNUR Science pu college, jamkhandi

Senior secondary (2018 - 2019) percentage **87%**

National College of Ireland, Dublin

Masters of Science in Artificial Intelligence (2025 - Present)

PASSION

AI

Studied and deeply understood the Attention Is All You Need, fascinated by transformer models and attention mechanisms.

Web3

Enthusiastic about blockchain and decentralisation, exploring ways to empower users with control over digital identities.
