Dublin, Ireland

PROFESSIONAL SUMMARY

Cybersecurity professional with 3+ years of experience in Security Operations, Threat Detection, and Cloud Security Monitoring across enterprise environments.

Specialized in detection engineering, incident response investigations, and SIEM analytics using Microsoft Defender, Azure Sentinel, and KQL queries.

Experienced in mapping detections to MITRE ATT&CK, building automated SOC playbooks, and integrating threat intelligence feeds to enhance detection coverage.

Currently pursuing MSc in Cyber Security at the National College of Ireland with research focused on AI-driven intrusion detection systems for advanced threat detection.

EXPERIENCE

HCLTech Senior Analyst

Aug 2022 - Aug 2025

- Investigated 300+ security alerts weekly across endpoint, identity, and cloud environments using Microsoft Defender and Azure Sentinel, reducing mean-time-to-response (MTTR) by 28%.
- Designed and deployed 25+ KQL detection rules in Azure Sentinel, improving detection coverage and reducing false positives by 35%.
- Built incident response playbooks and automation workflows using Azure Sentinel to streamline triage and containment.
- Integrated threat intelligence feeds (TAXII) into EDR systems and mapped detections to MITRE ATT&CK techniques.
- Designed security dashboards and detection queries to identify anomalies such as privilege escalation, impossible travel logins, and authentication failures.
- Led SOC improvements by fine-tuning Microsoft Defender detection rules and improving alert signal quality.
- Performed threat hunting investigations using endpoint telemetry, identity logs, and cloud activity data.
- Conducted root cause analysis of security incidents and produced investigation reports for internal and client stakeholders.
- Ensured security posture alignment with compliance frameworks including ISO 27001, NIST, and GDPR.
- Mentored L1 analysts and provided guidance on incident triage, investigation techniques, and SOC procedures.

TECHNICAL SKILLS

SIEM & Detection Engineering

Azure Sentinel, SIEM Rule Development, Log Correlation, KQL Query Development

EDR / Endpoint Security

Microsoft Defender for Endpoint, Threat Detection, Behavioral Analysis

Cloud Security

Microsoft Azure, Azure AD (Entra ID), Defender for Cloud, Identity Security

Threat Intelligence

MITRE ATT&CK, Cyber Kill Chain, TAXII Feeds, IOC Analysis

Programming & Automation

Python, PowerShell, Security Automation, Playbook Development

Frameworks & Compliance

NIST, ISO 27001, STRIDE Threat Modeling

EDUCATION

National College of Ireland

MSc in Cyber Security (pursuing)

Sept 2025 - Aug 2026

Maharaja Surajmal Institute of Technology - GGSIPU

Bachelor of Engineering, Computer Science (CGPA 8.9)

Aug 2018 - July 2022

DAVSV Public School

Senior Secondary , Stream - Science with Computer Science (94.4%)

May 2016 - May 2018

CERTIFICATIONS AND PROJECTS

CERTIFICATIONS

Microsoft Azure Security Engineer Associate (AZ-500)

Microsoft Security, Compliance & Identity Fundamentals (SC-900)

ITIL v4 Foundation

Currently Preparing

CompTIA Security+

PROJECT

AI-Driven Intrusion Detection System (MSc Research)

- Designed a hybrid machine learning framework for detecting advanced persistent threats and polymorphic malware.
- Implemented Random Forest classification with feature optimization techniques.
- Integrated explainable AI models (SHAP, LIME) to improve SOC analyst interpretability.
- Evaluated detection accuracy using synthetic attack datasets generated through CTGAN.
