OVERVIEW

I am Somkumar. I am a computer engineering graduate. I started coding by writing automation scripts/small projects for my day-to-day tasks. Now with a formal degree in computer engineering and several rigorous online courses, I am looking forward to starting a new job. Outside of coding, I am an avid cook and driving enthusiast.

TECHNICAL SKILLS

Programming Languages: HTML/CSS, Python, JavaScript, TypeScript, C/C++

Frameworks/Paradigm: ReactJS, Next.js, Node.js, express.js, cron, Object-oriented design, Distributed computing, Security

Developer Tools: Git, Github, Docker, AWS(Amazon Web Services), VS Code, Linux commands

EXPERIENCE

ClubTravalet

Kochi, India

Software Developer Engineer

Feb 2024 – Oct 2024

- Implemented payment using Razorpay, resulting in a seamless payment user experience, reducing manual labor by 80% and achieving more than 2500 transactions weekly.
- Designed and implemented an interactive dashboard using Next.js and Shadcn library, providing users with a comprehensive UI.
- Designed and developed a flight booking portal, implementing live flight listing and booking flight tickets for customers with the help of 3rd party APIs like Amadeus.
- Engineered and deployed modular components and widgets with core functionalities including booking and payments systems.

TutorComp

Kochi, India

Software Developer Engineer

Sept 2023 – Feb 2024

- Developed a scalable notification system for 10000+ users across different time zones to help users be notified about academic and credit balance details. increasing by 20% increase in user engagement.
- Developed a mobile application using React Native for both IOS and Android, in a team of 2 developers and a designer.
- Reduced loading time by 10% by engineering robust Web servers using Fastify and Node.js, leading to a better user experience

PROJECTS

Cloud based photo sharing platform | [Website](#) | [Github](#)

- Developed a Next.js and TypeScript web app for creating and managing private photo albums, showcasing full-stack development skills.
- Optimized image loading and display using Next.js Image component and client-side processing, significantly improving user experience and performance.
- Utilized AWS S3 bucket for storage of media in the cloud infrastructure, made use of AWS sdk (software development kit) to connect with cloud storage bucket S3
- Utilized React Server Components and Server Actions for enhanced SEO and performance, demonstrating proficiency in cutting-edge web development practices.

Rubik's Cube Session Tracker | [Github](#)

- Streamlined cubing session tracking for speedcubers through a cutting-edge React.js web app, resulting in a 50% reduction in time spent on manual session recording and analysis.
- Implemented Timer, session history, and leaderboard features within the speedcubing app, enabling users to track personal bests, review session history, and compete with others.
- Visualized GitHub data to show collaboration
- TechStack Used: Next.js, React.js, Node.js, TRPC, Typescript, TailwindCSS, Prisma, PostgreSQL

EVoting App | [Github](#)

- Developed a secure eVoting platform using React.js for the front end and integrated it with Ethereum smart contracts through Web3.
- Implemented continuous delivery using TravisCI to build the plugin upon new a release
- Utilized Truffle and Ganache for efficient smart contract development, testing, and deployment.
- TechStack Used: React.js, node.js, javascript, Ethereum, web3, truffle, ganache

EDUCATION

National college of Ireland

MSc in Artificial Intelligence

Dublin, Ireland

Sept 2025 – Present

Vidya Academy of Science and Technology

B.E. in Computer Science and Engineering

Kerala, India

Aug 2019 – Jul 2023
